

Full Stack Developer

EpiProdux is looking for a Full-Stack engineer to join the team and take part of our entire product development cycle from ideation to launch, and beyond. EpiProdux is a unique SaaS for a SME business & product development. We disrupt how companies grow!

Requirements:

- ★ You have at least 4 years of real-world experience creating modern web applications in JavaScript.
- ★ You are proficient in PostgreSQL, Node.js and Vue.js (including Vuex).
- ★ You can turn our designer's vision into pixel-perfect layouts in HTML and CSS that look and feel good on every modern browser.
- ★ You know your limits and how to manage your time.

Nice-To-Have:

- ★ Experience with Linux server administration.
- ★ Experience with scaling web applications to accommodate growth.

Compensation:

- ★ EpiProdux stock options
- ★ Competitive salary
- ★ Sports compensation
- ★ Participate in EIA programs worldwide & mentor the future generation of builders

To apply: Send your CV to hr@inacademy.eu before 25th of August 2020.
